For More Comfortable Life

► What is PAT IoT ?

PAT IoT Solutions develops IOT based solutions for house hold and industrial needs. **PAT IoT Solutions** provides a mobile application with which your low or heavy wattage appliances can be accessed and controlled.

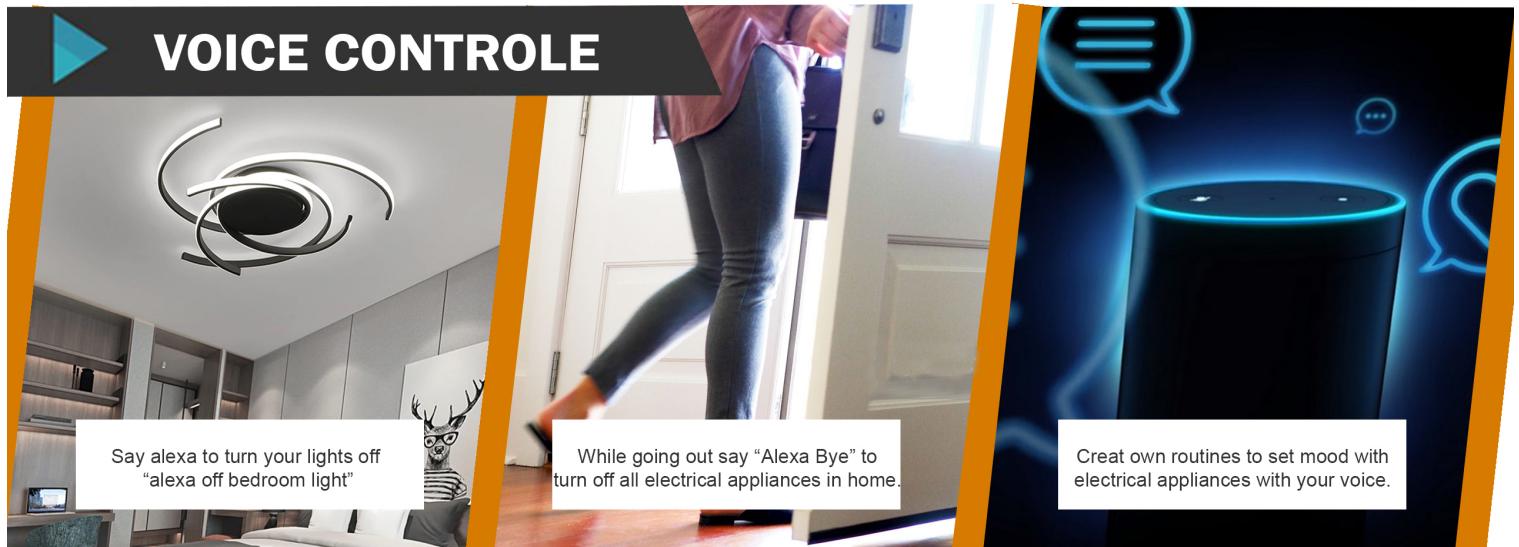

PAT IoT Solutions adds following remarkable features:

- Accessibility: Control all your appliances from anywhere in the world.
- Scheduling appliances: You can schedule your appliances such as a geyser, AC etc.
- Keeps home safe: Get instant notifications of any intrusion
- User-friendly setup: The **PAT IoT** setup syncs with physical switches. This means existing switches work the same way as before. No extra wiring Required
- Multi-access: More than one person from your family/team can operate at a time from anywhere, while all of them get the updates of appliances.
- Grouping option : Grouping allows you to create set of appliances to be controlled at a time by a click
- Voice Control: Our modules are integrated with Alexa this allows to control all switches or set of switches with voice commands through Alexa.

► MOBILE APP

► VOICE CONTROL

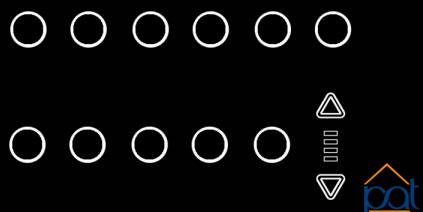

Say alexa to turn your lights off
"alexa off bedroom light"

While going out say "Alexa Bye" to
turn off all electrical appliances in home.

Create own routines to set mood with
electrical appliances with your voice.
